FREE RAINFALL PRINTABLE

Weekly lawn watering tracker

Place / lawn area _____ Date range _____

Units: in / mm _____

Your weekly target (start near 1 in / 25 mm) _____

Water or skip: compare known rain with your weekly target, then record any watering. The starting target of about 1 in / 25 mm is adjustable for your lawn, season and soil.

Weekly water record — all amounts in the units chosen above

Use what you know

Record watering as a depth in the same units as rain. A simple remaining budget is target − rain − watering, with no extra watering when the result is zero or below. Check the soil and local watering restrictions before deciding.

If rainfall readings are missing, mark the week incomplete. Inchfall's water or skip budget (Pro) reports "not enough data" when two or more days are missing; this sheet leaves the decision to you.

Local advice / seasonal target changes _____
