FREE RAINFALL PRINTABLE

Yearly rainfall record

Year _____ Place _____ Units: in / mm _____

Monthly rainfall — use the same units throughout

Month	Total	Normal	Difference[1]	Notes
January				
February				
March				
April				
May				
June				
July				
August				
September				
October				
November				
December				

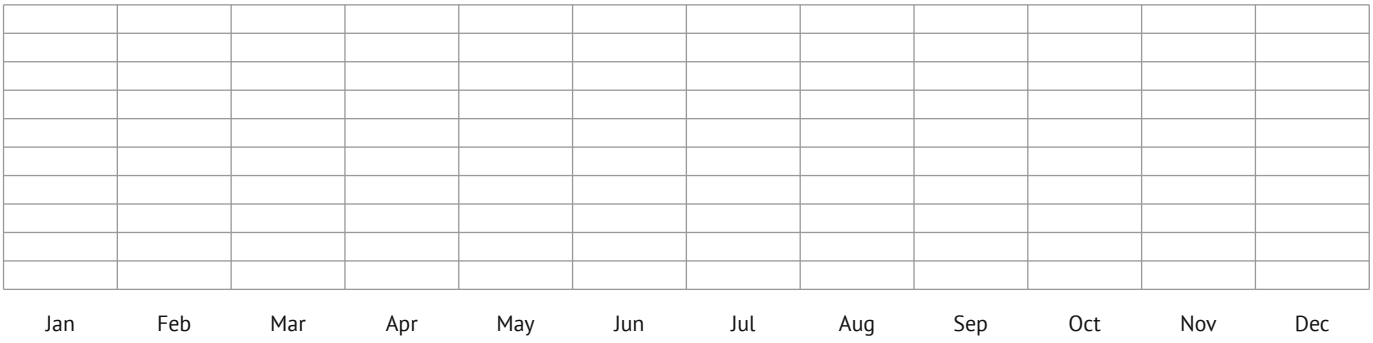

[1] Difference = total − normal. Write the normal's source and period below. Mark missing or incomplete months; do not treat gaps as zero.

Normal source / period _____

Season start / end _____ Season total _____ Missing days _____

Monthly totals — draw a bar for each month. Choose and label your own scale.

Units: _____ Top of grid: _____ Each grid step: _____

A normal is a long-term average, not a forecast. Compare matching periods; label totals incomplete when readings are missing.
